Tel: 01728 747 113 - e-mail: sales@botanica.org.uk

www.botanicaplantnursery.co.uk

OTHER SERVICES

Soil Screener

Soil screening removes stones and debris from your soil, making your beds cleaner and smoother to allow for easier planting. Alongside this, removing debris from your soil removes alkaline materials, which improves the PH level, this allows for superior growing and improved nutrients.

Our soil screen is easy to use by hand or by machine and is a very cost-effective procedure. It allows you to make good soil out of what would usually be removed from site which will save you money both from removal and replacement.

For more information, please ask one of the sales team.
